MANILA

REPUBLIC OF THE PHILIPPINES NATIONAL ECONOMIC AND DEVELOPMENT AUTHORITY

HIS EXCELLENCY PRESIDENT FERDINAND E. MARCOS

Chairman

Honorable VICENTE B. VALDEPEÑAS, JR.

Minister of Economic Planning
and
Director-General of the Authority

NATIONAL CENSUS AND STATISTICS OFFICE

TITO A. MIJARES

Executive Director & Civil Registrar-General

MARCELO M. ORENSE Assistant Executive Director

FOREWORD

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

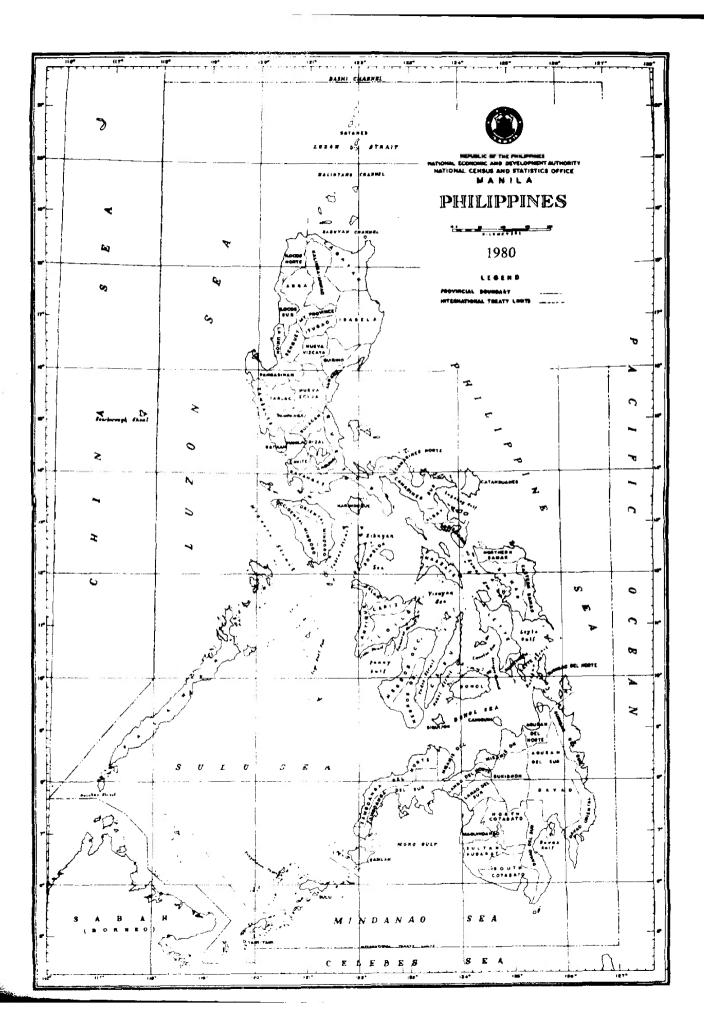

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

Manila, Philippines May 1983

Explanatory Text

GENERAL

INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

AUTHORITY FOR THE 1980 CENSUS

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every oensal year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

CENSUS BOARDS

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

CENSUS ORGANIZATION

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

_			
PO	nula	ition.	Items

Age Sex

Marital Status

Highest Grade Completed

Literacy

Language/Dialect Spoken in the

Household

Gainful and Non-Gainful Occupation

Major and Minor Industry

Migration

Housing Items

Type of Building
Type of Occupancy

Construction Materials of Roof and Outer

Walls

Year Built

Floor Area of Dwelling Unit

Tenure of Owner-Occupant with Respect

to the Land

Kind of Lighting Facilities

Use and Source of Water Supply

Type of Toilet Facilities Kind of Cooking Fuel Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

DEFINITION OF TERMS AND CONCEPTS

I - POPULATION

BARANGAY

A barangay is the smallest political unit in the country and generally its enumeration is

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

ENUMERATION AREA

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

- 1. In their entirety, all cities and municipalities having a population density of at least 1.000 persons per square kilometer.
- 2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- 3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c At least three of the following:
 - 1) A town hall, church or chapel with religious services at least once a month:
 - 2) A public plaza, park or cemetery;
 - 3) A market place or building where trading activities are carried on at least once a week;
 - 4) A public building like a school, hospital, puericulture and health center or library.
- 4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

- 1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
- 2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
 - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

or within one year, if abroad;

- b. students who usually go home to their respective households at least once a week;
- c. persons working elsewhere who usually go home to their respective households at least once a week;
- d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions;
 (2) in mental hospitals;
 (3) in leprosaria or leper colonies; and
 (4) in rehabilitation centers for drug addicts;
- e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
- f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
- g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
- 3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
- 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
- 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months:
- 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
- 7. Persons found in the household who have no usual place of residence elsewhere;
- 8. Persons found in the household who are not certain of being enumerated elsewhere:
- Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
- 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
- 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
- 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

- Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
- 2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
- 3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
- 4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
- 5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival:
- 6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a balikbayan who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
- 7. Citizens of foreign countries in refugee camps/vessels; and
- 8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

HEAD OF HOUSEHOLD

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

- 1. Spouse a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
- 2. Son/daughter the head's own child, stepchild, or adopted child.

- 3. Son-in-law/daughter-in-law refers to a household member related to the head by marriage to his daughter or son.
- 4. Grandson/granddaughter child of the son or daughter of the head.
- 5. Other relative a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
- 6. Others any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head

AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single If never been married.
- b. Married Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated —If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

CITIZENSHIP

Citizenship is defined as the lega' nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

USUAL OCCUPATION

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

INDUSTRY

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

II - HOUSING

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesoria, condominium) that was vacant;

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

The different types of buildings are:

- 1. Single house a complete structure intended for one household. It includes the so-called "nipa hut" or a small house that is built as a more or less permanent dwelling unit.
- 2. Duplex a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
- 3. Apartment/accesoria/condominium/row house

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

- 4. Improvised (barong-barong) a makeshift or roughly constructed house usually built with salvaged materials.
- 5. Commercial/industrial/agricultural buildings not intended for human habitation but used as dwelling units at the time of the census.
 - Commercial a building used for transacting business or rendering professional services, such as a storage or an office building.
 - Industrial a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.
 - Agricultural any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.
- 6 Other housing unit (natural shelter, boat, etc.)

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

- 7. Hotel, lodging house, dormitory, etc. This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
- 8. Institutional (hospital/convent/school dormitory/penal institution, etc.) a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
- 9. Other collective living quarters any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Asbestos
- 4. Cogon/nipa
- 5. Makeshift/salvaged materials
- 6. Others (anahaw, etc.)

CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Wood/plywood
- 4. Mixed tile/concrete/brick/stone and wood/plywood
- 5. Asbestos
- 6. Bamboo/sawali
- 7. Cogon/nipa
- 8. Makeshift/salvaged materials
- 9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

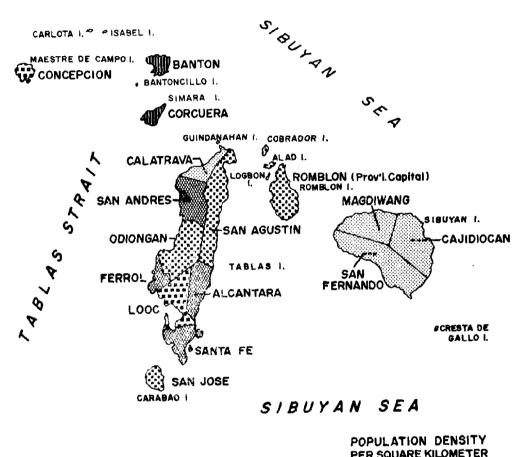

NUMBER OF ROOMS IN THE DWELLING UNIT

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

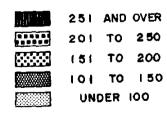

FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was tak in and added together to get the total floor are of the dwelling unit. Areas of floor spaces that are not considered rooms such a bathroom, toilet, storeroom, passageway were excluded in determining the floor area.

PER SQUARE KILOMETER

POPULATION DENSITY OF ROMBLON PROVINCE BY MUNICIPALITY: 1980

Rombion: A Brief Analysis

Romblon is composed of sixteen municipalities spread over three main islands — Romblon, Sibuyan and Tablas — and several islets. Located almost at the center of the Philippine Archipelago, the province lies between Mindoro and Masbate, below the southern tip of Marinduque, and north of Panay island.

Most of the staple crops of the province are grown in Tablas, the biggest of its major islands. Sibuyan, the second largest, is thickly forested and mountainous, hence, less developed than either Tablas or Romblon. Its wide grazing lands, mercury ore deposits and vast timber resources, however, are great potentials for its economic growth and development. The province is especially famous for its marble, large deposits of which are found in the island of Romblon. Though the smallest of the three major islands, Romblon is the seat of the provincial government and the center of commercial and economic activities in the province.

POPULATION

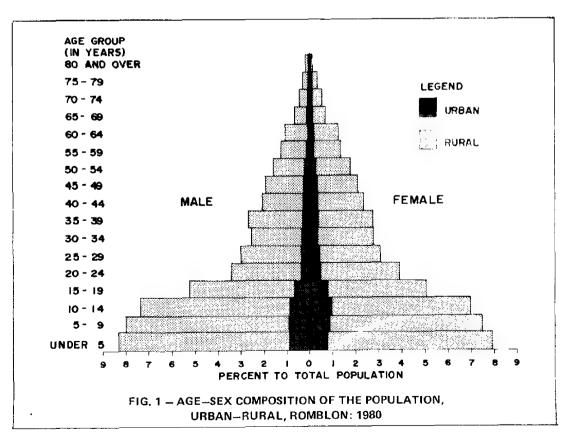

Romblon's population on May 1, 1980 totalled 193,174, representing an increase of 10,965 or 6.02 percent over 1975. Annual geometric growth rate of the population during the 1975-1980 intercensal period averaged 1.18 percent, 0.57 percentage point lower than the growth rate (1.75%) registered in 1970-1975. Nevertheless, the population density increased from 134.4 persons per square kilometer in 1975 to 142.5 in 1980.

The province is still predominantly rural. Despite a decrease in the proportion of the rural populace over the past five years, rural residents still constitute 87.55 percent of the population. The proportion of rural males to the total population dropped from 44.73 to 43.95 percent while that of rural females rose slightly from 43.53 to 43.60 percent. Unlike the rural sector, however, the proportions of urban males as well as that of urban females respectively moved up to 5.95 and 6.50 percent.

Table A shows the distribution of the urban-rural population by sex in two censal years:

TABLE A — URBAN-RURAL POPULATION BY SEX. ROMBLON: 1975 AND 1980

Area Classification and Sex	19	80	19	75
	Number	Percent	Number	Percent
Total	<u>193,174</u>	100.00	<u>182,209</u>	100.00
Male	96,401	49.90	91,941	50.46
Female	96,773	50.10	90,268	49.54
Urban	24,056	12.45	21,390	11.74
Male	11,494	5.95	10,445	5.73
Female	12,562	6.50	10,945	6.01
Rural	169,118	<u>8</u> 7.55	160,819	88.26
Male	84,907	43.95	81,496	44.73
Female	84,211	43.60	79,323	43.53

Of the total population 96,401 were males and 96,773 were females, or a nearly balanced sex ratio (number of males for every 100 females) of 99.62. The rural population, with a sex ratio of 100.83, slightly exceeded the overall sex ratio. More than just maintaining the 1975 excess of females over males, the urban population decelerated its sex ratio to 91.50. In contrast, rural males had outnumbered rural females in 1975 when the rural sex ratio reached 102.74.

Figure 1 shows the 1980 proportions of males and females, urban and rural, to the total population. As seen in the diagram, the rural sector exhibits a pyramid-like structure which is characterized by declining percentages of males and females as the five-year age groups grow older. However, a slight deviation from the pyramidal structure is observed among the males aged 35 to 39 years old. On the other hand, the urban sector shows various deviations, from the youngest age group to the 5-9 years old and between several other older age groups (Table 2).

AGE COMPOSITION

The proportion of persons belonging to the younger age group (0-14 years) dropped from 48.12 percent in 1975 to 45.95 percent in a span of five years, while those in the productive (15-64 years) and older (65 years and over) age groups went up from 48.98 to 50.71 percent and from 2.90 to 3.34 percent, respectively. Thus, the median age of the population increased from 15 years in 1975 to 16 years in 1980.

Shown below is the broad-age distribution of the population since 1970.

TABLE B – AGE COMPOSITION OF THE POPULATION, ROMBLON: 1970, 1975 AND 1980

Age Composition	19	980	1975		1970	
	Number	Percent	Number	Percent	Number	Percent
Total	193,174	100.00	182,209	100.00	167,082	<u>100.00</u>
0-14 years	88,768	45.95	87,673	48.12	83,722	50.11
15-64 years	97,963	50.71	89,251	48.98	78,795	47.16
65 years and over	6,443	3.34	5,285	2.90	4,565	2.73

Due to a slight increase in the proportion of persons in the productive age group, the dependency ratio (number of dependents for every 100 persons in the productive age group) decelerated by 6.96 (from 104.15 in 1975 to 97.19). Urban and rural dependency ratios varied considerably. Of the urban population, 41.54 percent are 0-14 years old; 53.44 percent, 15-64 and 5.02 percent, 65 years and over, resulting in a dependency ratio of 87.10. On the other hand, the rural sector reached a dependency ratio of 98.71 with 46.58 percent of its population 0-14 years old; 50.32 percent, 15-64 and 3.10 percent, 65 and over.

MARITAL STATUS

The proportion of married persons consistently increased from 47.74 percent in 1970 to 47.83 percent in 1975 and 50.18 percent in 1980. Never married persons, on the other hand, dropped from 47.71 percent in 1975 to 44.35 percent. The widowed and the divorced or separated both moved up to 4.88 and 0.52 percent, respectively, and those who did not bare their marital status, to 0.07 percent.

The proportion of never married males follows an up and down trend – 49.49 percent in 1970, 50.50 percent in 1975 and 46.92 percent in 1980. Consequently, married males decreased from 48.14 percent in 1970 to 47.22 percent in 1975 and up to 50.51 percent in 1980. A similar trend is also observed in the proportion of never married females, from 44.79 percent in 1970, up to 44.92 percent in 1975 and down to 41.86 percent in 1980. The proportion of married females continuously increased from 47.35 percent in 1970 to 48.45 percent in 1975 and 49.88 percent in 1980. The percentage of widowed and divorced or separated persons was higher among females than among males – 7.44 percent of the females were widowed and 0.73 percent, divorced or separated, compared to the males with 2.24 percent and 0.29 percent, respectively.

Table C classifies the population 10 years old and over by sex and marital status in the last three censal years.

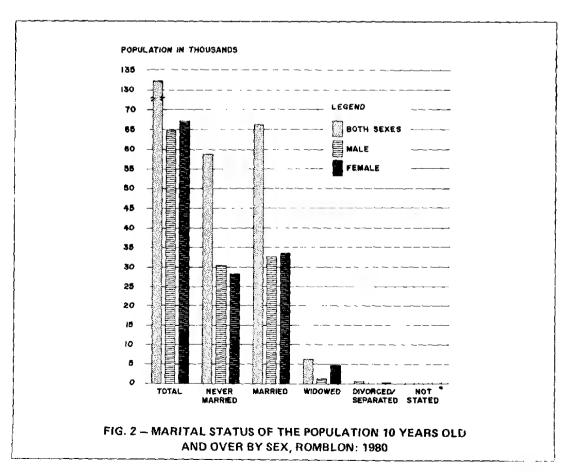

TABLE C - POPULATION 10 YEARS OLD AND OVER BY SEX AND MARITAL STATUS, ROMBLON: 1970, 1975 AND 1980

Sex and	1	1980 1975		975	1970	
Marital Status	Number	Percent	Number	Percent	Number	Percent
Both Sexes	132,133	100.00	122,000	100.00	108,505	100.00

Not stated	54	0.09	30	0.05	82	0.15

HIGHEST GRADE COMPLETED

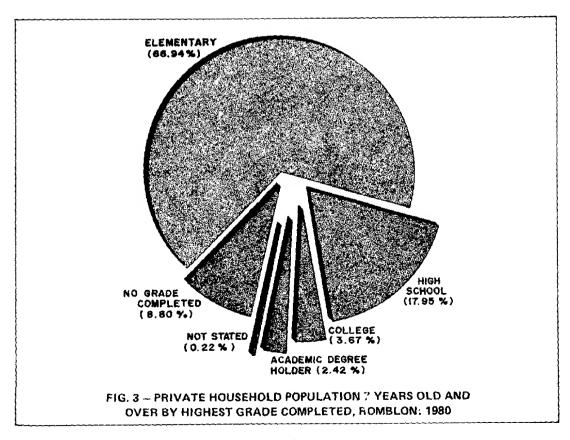

More persons attended school during the last five years, thus reducing the proportion of persons with no formal education to less than one-tenth (8.80%) of the private household population 7 years old and over. Those reaching only the elementary level substantially declined from 70.93 to 66.94 percent, an indication that the proportion of persons ending up with higher educational attainment increased. The proportions of persons who continued up to high school increased to 17.95 percent, and persons going on to college but were still undergraduates, to 3.67 percent. Meanwhile, academic degree holders rose to 2.42 percent. About 0.22 percent did not state their highest educational attainment.

Of those with elementary education, 32.16 percent finished any of the first three grades; 18.62 percent completed the fourth grade; 14.12 percent, the fifth grade and 35.10 percent, the sixth or seventh grade. Majority of those schooled until the secondary level did not go beyond the third year (65.78%) while 34.22 percent graduated from fourth year. More than four-fifths of all college undergraduates (86.91%) completed at most the third year and 13.09 percent, fourth year or higher (Table 5).

Shown in Table D is the distribution of the private household population 7 years old and over by highest grade completed in 1975 and 1980:

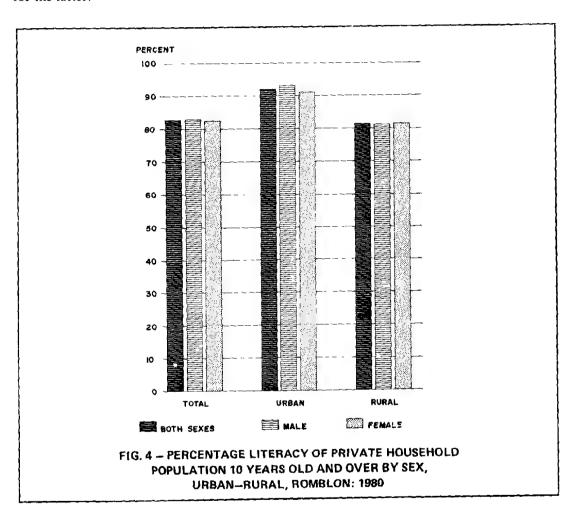

TABLE D ~ PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER BY HIGHEST GRADE COMPLETED, ROMBLON: 1975 AND 1980

Highest Grade	19	80	1975		
Completed	Number	Percent	Number	Percent	
Total	150,273	100.00	139,956	100.00	
No grade completed	13,231	8.80	12,768	9.12	
Elementary	100,598	66.94	99,274	70.93	
High school	26,972	17.95	19,697	14.08	
College	5,508	3 . 67	3,621	2.59	
Academic degree holder	3,640	2.42	2,732	1.95	
Not stated	324	0.22	1,864	1.33	

LITERACY

The literacy rate of the private household population 10 years old and over stood at 82.80 percent. Of the total males aged 10 and over, 82.22 percent were literate, compared to 82.77 percent of the total females in the same age group. The literacy rate was considerably higher in urban than in rural areas -92.08 percent for the former and 81.38 percent for the latter.

LANGUAGE OR DIALECT

More than 20 languages and dialects are generally spoken by the 35,639 households in the province, with Romblon predominating in eleven municipalities and Banton, in five.

Over two-thirds, or 69.74 percent of the private households generally speak Romblon and 27.19 percent, Banton. Hiligaynon is spoken by 2.04 percent; Tagalog, 0.37 percent and all other languages and dialects, 0.17 percent. The proportion of households speaking Romblon and Banton slightly varies between the urban and rural areas: 72.70 percent and 23.21 percent, respectively for the former and 69.32 percent and 27.75 percent, respectively for the latter (Table 7).

GAINFUL OCCUPATION

Out of 104,302 persons 15 years old and over, 52,178 are with gainful occupations, 12.71 percent higher than the number of gainful workers (46,295) in 1975. Gainful employment is heavily predominated by the males (77.09%) with the females composing less than one-fourth, or 22.91 percent of the total gainful workers.

Still the largest major occupation group, agricultural, animal husbandry and forestry workers, fishermen and hunters constitute 58.46 percent of the total gainful workers despite a decrease of 6.36 percentage points since 1975. Production and related workers, transport equipment operators and laborers emerged with the highest gain, from 19.26 percent to 22.34 percent. Service workers hiked to 6.39 percent; professional, technical and related workers, to 5.45 percent and clerical and related workers, to 1.97 percent. Sales workers, however, declined from 4.15 to 3.75 percent and administrative, executive and managerial workers, from 0.50 to 0.35 percent. On the other hand, workers not classifiable by occupation reached 1.29 percent.

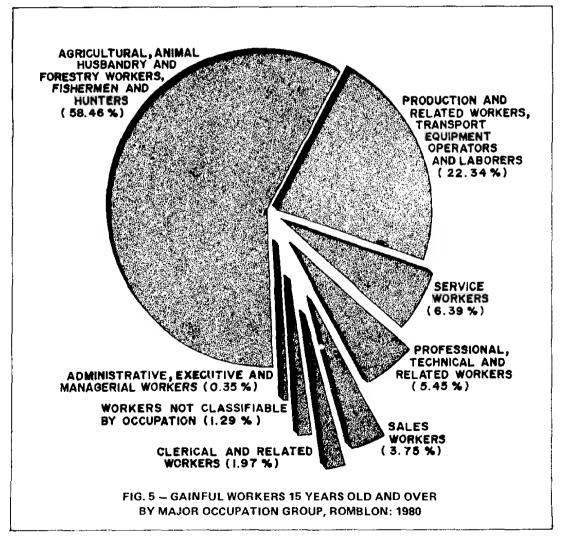

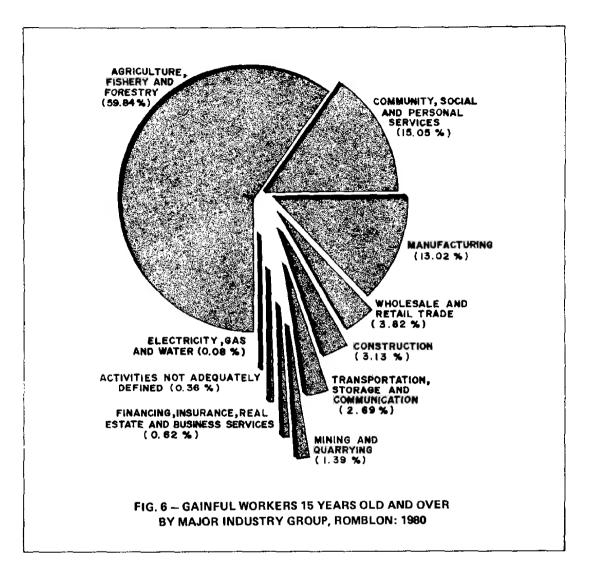

Table E shows the distribution of the working population 15 years old and over by major occupation group in two censal years:

TABLE E - GAINFUL WORKERS 15 YEARS OLD AND OVER BY MAJOR OCCUPATION GROUP, ROMBLON: 1975 AND 1980

Major Occupation Group	19	80	1975	
	Number	Percent	Number	Percent
Total	<u>52,178</u>	100.00	46,295	100.00
Professional, technical and				
related workers	2,843	5.45	2,278	4.92
Administrative, executive and managerial workers	182	0.35	232	0.50
Clerical and related workers	1,030	1.97	572	1.24

transport equipment operators and laborers	11,655	22.34	8,918	19.26
Workers not classifiable by			,	
occupation	675	1.29	259	0.56

INDUSTRY

Agriculture, fishery and forestry — the largest major industry group, account for 59.84 percent of the total gainful workers. Producers of agricultural crops chiefly compose the group, making up 79.61 percent. About 15.78 percent are in fishery and 3.48 percent, in forestry. Community, social and personal services, ranking second, provide jobs to 15.05 percent. Workers in this industry group tend to crowd within three areas: personal and household services (46.61%), education services (28.02%), and public administration and defense (15.81%). Manufacturing employs 13.02 percent with 16.94 percent of the workers engaging in the manufacture of textile, wearing apparel and leather; 15.57 percent in the manufacture of wood and wood products, including furniture and fixtures; 11.55 percent in the manufacture of non-metallic mineral products except those of petroleum and coal and 7.01 percent, of food, beverages and tobacco and the rest (48.93%), other manufacturing industries. Wholesale and retail trade has 3.82 percent of all gainful workers; construction, 3.13 percent; transportation, storage and communication, 2.69 percent; mining

and quarrying, 1.39 percent; financing, insurance, real estate and business services, 0.62 percent; activities not adequately defined, 0.36 percent and electricity, gas and water, 0.08 percent (Table 9).

MIGRATION

Majority of the private household population 5 years old and over (97.65% of the males and 97.39 % of the females) resided in the same municipality where they had lived on May 1, 1975. Those who had a different place of residence were either migrants from other provinces (1.47%) or from another municipality of Romblon (0.92%). Residents of foreign countries accounted for merely 0.10 percent. Movements within the province and from another province involved more females than males. A greater number of those who transferred residence, whether within the province, from another province or from abroad, settled in rural than in urban areas (Table 10).

TYPE OF BUILDING

From 77.34 percent in 1970, households occupying single houses accelerated to 96.78 percent in 1980. More than four-fifths (87.90%) of these households are located in rural areas with only 12.10 percent in urban areas. Improvised structures, most of which are found in the rural areas, shelter 2.15 percent of the total households, down by 88.03 percent since 1970. Households living in other collective living quarters make up 0.01 percent; those occupying duplexes, 0.57 percent and those in commercial/industrial/agricultural buildings, 0.31 percent. While majority of the households in duplex and commercial/industrial/agricultural structures are urban residents, all of those in other collective living quarters are rural dwellers. Households in apartment/accesoria/condominium/row house/etc. account for 0.17 percent and those in hotel, lodging house, dormitory, etc., 0.01 percent. All households in these two types of buildings are in the urban areas.

The following table gives the distribution of households in different types of building during the last 10 years.

TABLE F -- NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS BY TYPE OF BUILDING, ROMBLON: 1970 AND 1980

	19	980	1970	
Type of Building	Number	Percent	Number	Percent
Total	<u>35,639</u>	100.00	29,293	100.00
Single house	34,491	96.78	22,656	77.34
Duplex	201	0.57	93	0.32
Apartment/accesoria/condo-				
minium/row house/etc.	61	0.17	29	0.10
Improvised (barong-barong)	767	2.15	6,409	21.88
Commercial/industrial/agri-				
cultural	109	0 31	102	0.35
Other housing unit: natural				
shelter, boat, etc.	*			_
Hotel, lodging house, dor-	_			
mitory, etc.	5	0.01		_
Institutional (hospital, convent,			4	0.01
school dormitory, etc.)	~		4	0.01
Other collective living quarters (military camp, etc.)	5	0.01		

TYPE OF OCCUPANCY

A large majority of the households (88.41%) are owners of the dwelling units they occupy; only 6.65 percent are tenants/lessees; 4.49 percent, rent-free occupants and 0.45 percent, subtenants/sublessees (Table 1).

CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Nearly two-thirds of the households (66.50%) in Romblon live in dwelling units roofed with cogon/nipa. Almost one-fifth (18.15%) of the households occupy dwelling units with roof of other materials (anahaw, etc.) and 13.91 percent, of galvanized iron/aluminum. Households in dwelling units with roof of makeshift/salvaged materials constitute 0.90 percent; of tile/concrete/brick/stone, 0.43 percent and of asbestos, 0.11 percent.

More than one-half (58.38%) of the households in the urban areas are staying in dwelling units roofed with cogon/nipa and 38.72 percent, with galvanized iron/aluminum. In rural areas, however, 67.66 percent of the households are in dwelling units with roofs of cogon/nipa; 20.53 percent, of other materials and 10.36 percent, of galvanized iron/aluminum.

Cogon/nipa likewise wall the exteriors of dwelling units occupied by 33.46 percent of the total households. Units with outer walls of wood/plywood are occupied by 21.62 percent; of other materials (anahaw, etc.), 18.38 percent; of bamboo/sawali, 11.41 percent; of mixed tile/concrete/brick/stone and wood/plywood, 9.09 percent and of tile/concrete/brick/stone, 4.38 percent. A few households occupy dwelling units with outer walls of makeshift/salvaged materials (1.21%), galvanized iron/aluminum (0.30%), and asbestos (0.15%).

Almost one-third (29.74%) of the urban households live in dwelling units with outer walls of wood/plywood; 26.89 percent, of mixed tile/concrete/brick/stone and wood/plywood; 19.71 percent, of cogon/nipa; and 13.74 percent, of tile/concrete/brick/stone. Among rural households, 35.43 percent use cogon/nipa; 20.82 percent, other materials; 20.46 percent, wood/plywood; and 12.03 percent, bamboo/sawali. A few rural households also use mixed tile/concrete/brick/stone and wood/plywood (6.54%) and tile/concrete/brick/stone (3.04%) as construction materials for the outer walls of their dwelling units (Table 2).

YEAR BUILT

Newly built dwelling units (those erected between 1976 and 1980) house the largest percentage of the households (52.85%). Less than one-fifth, or 19.75 percent occupy units constructed in 1971-1975; 16.51 percent, in 1961-1970; 6.85 percent, 1951-1960; 1.75 percen:, 1942-1950 and 2.29 percent, 1941 or earlier (Table 2).

FLOOR AREA OF DWELLING UNIT

A great majority (90.38%) of the households occupy dwelling units of at most 49 square meters in floor area – 67.37 percent are sheltered in units under 30 square meters and 23.01 percent, 30-49 square meters. Barely one-tenth (9.62%) live in roomier dwelling units distributed as follows: 4.73 percent, 50-69 square meters; 2.51 percent, 70-79 square meters; 0.98 percent, 100-149 square meters; 0.62 percent, 150-199 square meters; 0.29 percent, 200-249 square meters; 0.25 percent, 250-299 square meters and 0.24 percent, 300 square meters and over (Table 3).

A greater proportion of rural (93.50%) than urban households (68.53%) are accommodated in dv. ling units with floor area not exceeding 49 square meters.

TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

Almost two-thirds (64.18%) of the 31,509 households who own the dwelling units they occupy likewise own the land where the structure is erected. About 4.57 percent are lessees or sublessees; 23.09 percent, farm lessees/agricultural tenants of landowner; 2.69 percent, of other legal tenure; and 5.47 percent, no tenure (squatter, etc.).

It is interesting to note that among the urban households, 81.57 percent are owners of the land on which their dwelling units stand while 10.60 percent are lessees or sublessees. Among the rural households, 62.11 percent and 3.85 percent fall under the respective categories while one-fourth, or 25.46 percent are farm lessees/agricultural tenants of landowners (Table 4).

KIND OF LIGHTING FACILITIES

Kerosene is still the most common type of lighting facility in the province, although the proportion of households using it decreased from 96.77 percent in 1970 to 92.87 percent in 1980. Liquefied petroleum gas (LPG) is used by 5.39 percent of the total households; electricity, by 1.35 percent; oil, 0.17 percent; and other kinds, 0.22 percent. As in 1970, the proportion of households using kerosene is still higher in rural (93.52%) than in urban areas (88.40%). Only a few households avail of electricity – 8.24 percent for urban and 0.36 percent for rural households (Table 5).

SOURCE AND USE OF WATER SUPPLY

Of the total number of households in the province, almost one-third (32.58%) obtain their drinking water from the spring; 18.63 percent from the faucet, community water system; 16.96 percent from dug well; 16.44 percent from tubed/piped deep well; 11.23 percent from tubed/piped shallow well; 3.25 percent from lake, river, stream, etc. and 0.91 percent from rain.

For kitchen use, 31.24 percent utilize water from spring; 18.62 percent from faucet, community water system; 17.18 percent, dug well; 15.99 percent, tubed/piped deep well; 11.39 percent, tubed/piped shallow well; 4.73 percent, lake, river, stream, etc. and merely 0.85 percent from rain. One-fourth (25.09%) of the total households likewise depend on springs as their source of water supply for washing clothes and one-fifth (20.20%), on lake, river, stream, etc. Water from faucet, community water system is used by 17.00 percent; dug well, 13.87 percent; tubed/piped deep well, 13.50 percent; tubed/piped shallow well, 9.46 percent; and rain, 0.88 percent (Table 6).

COOKING FUEL

Over a ten-year period, majority of the households still use the same kind of cooking fuel. More than ninety percent (93.49%) of the total private households cook with wood or charcoal — 94.32 percent among rural households and 87.70 percent among urban households. In 1970, households using wood or charcoal made up 94.90 percent. The corresponding figures for the rural and urban households were 95.78 percent and 88.34 percent. Kerosene is used by 3.44 percent; liquefied petroleum gas, by 1.35 percent; other kinds, 1.68 percent; and electricity, 0.04 percent (Table 8).

TOILET FACILITIES

Households using the open pit (17.41%) and the closed pit (16.82%) types of toilet facilities constitute more than one-third of the total households in the province. Only 15.04 percent use water-sealed toilets distributed according to depository as follows: 8.68 percent, sewer/septic tank and 6.36 percent, other depository. An insignificant 1.36 percent use other toilet facilities (pail system, etc.). Nearly one-half of the total households (49.37%) in Romblon, specifically in the rural areas (54.87%), still lack toilet facilities.

The urban sector, apparently on the way to switching to modern facilities, reported more than half of its households (63.86%) with water-sealed toilets, compared to 8.06 percent for the rural sector. Majority of the water-sealed toilets are for the exclusive use of the households. Users of the open pit and the closed pit (antipolo, etc.) types constitute 18.38 percent and 17.36 percent, respectively, of the rural households as against 10.62 percent and 13.11 percent of the urban households. Among the latter, 10.84 percent are without toilet facilities (Table 7).

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

Far from being extensively owned, radios were found in only 32.74 percent of the households in 1970, but by 1980 the proportion of households with radios increased to 60.51 percent. Owning a television set and a refrigerator/freezer, however, is still a luxury for most of the households. Merely 1.48 percent own a refrigerator/freezer and 0.31 percent, a television set. The proportions of households with these appliances are higher in the urban than in the rural areas. Almost three-fourths (71.64%) of the urban households own radios; 7.99 percent, refrigerators/freezers and 1.01 percent, television sets. The corresponding percentages for the rural households are 58.92 percent, 0.55 percent, and 0.21 percent (Table 9).
